Table of Contents

Executive Summary 4

Improved Bus Service is Essential for the Continued Prosperity of Dublin	5
Why Rethink the Bus Network?.....	6
How the Plan Was Developed.....	7
Basic Principles and Strategies	8
Public Response to the Network Design Strategies Was Highly Favourable	11
Public Response to the Network Proposal Has Resulted in Significant Revisions	12
The Revised Network Proposal.....	13
Big Idea: Spines and Frequent Orbitals.....	16
Big Idea: Expanding the Frequent Network.....	17
The Result: More Useful and Liberating Service.....	18
Next Steps	20

PART I - CHOICES REPORT (original release, June 2017; minor edits and updates, October 2019)

1 What is the Bus Network Redesign? 21

What Services Constitute the Bus Network?	22
Why Redesign the Bus Network?.....	24
BusConnects: Transforming City Bus Services	25
How the Network Redesign has Evolved.....	27

2 The Geometry of Useful Public Transport 29

Patronage Arises from Usefulness	30
Why Frequency Comes First.....	31
Patronage Depends on the Built Environment	32
Examples from Dublin: Density and Walkability.....	33
Examples from Dublin: Linearity.....	34
Examples from Dublin: Proximity/Continuity.....	35
Summary.....	36

3 Patterns of Demand 37

Indicators of Public Transport Demand in Residential Areas.....	38
Where there are more people, there is higher demand – Part 1	42
Identifying Regional Centres of Demand	43
Where there are more people, there is higher demand – Part 2	47
On weekdays, service is proportional to patronage.....	48
On weekends, levels of patronage may be suppressed by low service	49

4 Structure of the Existing Bus Network 50

Underlying Conditions – Regional Transport Infrastructure	51
The frequent bus network is entirely radial.....	53
Orbital bus routes are few and infrequent.....	54
The radial network was highly efficient, up to a point	55
The radial network makes buses converge in the centre.....	57
The existing cross city route pattern minimizes the need for interchange... ..	59
...which makes the network very complex, and more difficult to use.....	60
The fare structure reinforces avoidance of interchange	61

5 Strategies for a Redesigned Bus Network 62

How More Interchange Can Improve Travel Time	63
Four Strategies for a More Useful Network	66
Strategy #1: Standardize Patterns of Frequency and Span.....	67
Strategy #2: Simplify Radial Services to Form Very Frequent Spines	68
Strategy #3: Build Frequent Orbitals by Reducing Duplication.....	69
Strategy #4: Grow Suburban Feeder Networks Supporting the Major Routes	70
Summary of Choices and Next Steps	71

Table of Contents

PART II - NETWORK PROPOSAL (original release, June 2018; major revisions, October 2019)

6 How Public Consultation Has Informed the Network Proposal..... 72

Summary of the Planning and Consultation Process	73
First Public Consultation: Network Strategies	74
Second Public Consultation: 2018 Network Proposal	79

7 Revised Network Proposal 84

Principles and Process	85
Key Assumptions.....	86
Service Types and Route Numbering	87
A Major Investment in Added Service	90
Getting There Faster: the Frequent Network	91
Designing the Frequent Network: Spines and Orbitals.....	94
Proposed Service Hours and Frequencies: Spines and Orbitals (1/2)	100
Proposed Service Hours and Frequencies: Spines and Orbitals (2/2)	101
Completing the All-Day Network: Secondary Radials and Suburban Locals	102
Proposed Service Hours and Frequencies: Secondary Radials	104
Proposed Service Hours and Frequencies: Suburban Locals	106
Peak-Only Services	107
Proposed Service by Area: City Centre	109
Proposed Service by Area: Detailed Atlas and Descriptions.....	113
Infrastructure Considerations	166

8 How Would the Network Make Public Transport More Useful? 169

Measuring the Usefulness of the Proposed Network	170
Geographic Coverage	171
Travel Times and Access to Opportunity.....	173
Travel Time Examples - Isochrones.....	177

Appendix - Full List of Revisions to the Proposed Network..... 196

Full List of Changes - Spines and Branches	197
Full List of Changes - Orbitals.....	202
Full List of Changes - Numbered Radials.....	204
Full List of Changes - Suburban Locals	208
Full List of Changes - Peak-Only Services	213
