BusConnects Cork

The 2nd Round of Public Consultation is now underway

for Cork's Sustainable Transport Corridors (STCs)

BusConnects Cork is the National Transport Authority's (NTA) proposals to deliver **11 new Sustainable Transport Corridors** (STCs) for Cork. This will deliver:

91km of bus lane/bus priority

+

96km of cycle facilities (one direction) delivering 48km of the cycle network

Through BusConnects Cork the NTA is investing €600m in a sustainable future to support the city's growth over the coming two decades and meet our climate obligations. The new sustainable transport corridors will benefit the city in the following ways:

- create a more efficient public transport network
- reduce bus journey times and improve reliability
- create a safer environment for cyclists and pedestrians
- better serve the needs of all road users
- create a more sustainable and liveable city

In June 2022, BusConnects Cork commenced its first round of public consultation. The 13 week consultation led to three thousand submissions being received by the NTA.

YOU SPOKE AND WE LISTENED.

Based on your feedback last year, the NTA has made a number of revisions to its initial proposals. One of the main changes to note is that we are now proposing **11 schemes instead of 12 STCs**. Sunday's Well to Hollyhill STC is no longer being progressed as an individual scheme, with sections of the corridor being incorporated into adjacent schemes.

Have your say and review all of the other 11 revised proposals in detail, and, please visit:
