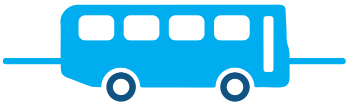
BusConnects Cork

A 3rd Round of Public Consultation is now underway

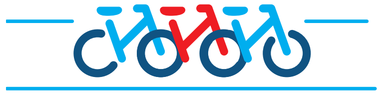
for Cork's Sustainable Transport Corridors (STCs)

The National Transport Authority (NTA) is proposing to develop **11 new Sustainable Transport Corridors (STCs)** as part of the BusConnects Cork programme. This will deliver



91km of bus lane/bus priority

+



98km of cycle facilities (one direction) delivering 49 km of the cycle network

BusConnects Cork aims to provide a better, more reliable and more efficient bus service for everyone in addition to providing safe cycling facilities along key routes. The new Sustainable Transport Corridors will benefit the city and surrounding areas in the following ways:

- Create a more efficient public transport network
- Reduce bus journey times and improve reliability
- Create a safer environment for cyclists and pedestrians
- Better serve the needs of all road users
- Create a more sustainable and liveable city

During March 2023, BusConnects Cork commenced the second round of public consultation. The 8 weeks consultation led to approx. 4,400 submissions being received by the NTA.

REFINING OUR PROPOSALS

Over recent months, the NTA has been making refinements along each corridor to take into consideration both the submissions received and ongoing local community engagement. In addition there has been further technical design work and urban realm improvements along each corridor.
